---

## SUMMARY

I'm a frontend developer with over one year of experience in JavaScript technologies. I usually use TypeScript to develop applications.

I have researched several AI models (such as YOLO, EasyOCR, and OpenAI) and applied them in my personal projects. I have also guided some students in developing products that are useful to society.

---

## WORK EXPERIENCE

### Frontend developer - NCC Asia

Jan 2024 - Present

- **Position:** Front-end developer
- **Project description:**
  - A mobile app that functions as a crypto wallet, allowing users to make transactions and exchange cryptocurrencies. It also supports multiple networks for development environments or the mainnet.
  - Develop a website to market the coin, allowing users to track its price, stay updated on events from the organization, and more.
- **Responsibilities:**
  - Implement the client's requirements and develop for both Android and iOS platforms.
- **Programming languages:** TypeScript, React Native, ReactJS, NextJS, Webflow

### Frontend Internship - Sun Asterisk

Jun 2022 - Sep 2022

- Created a project description specification for building the website. It was built to manage student's study processes and includes features such as creating study plans, allowing teachers to assign practice exercises to students, and more
  - Create coding frames and design database based on project descriptions
- 

## EDUCATION

### Da Nang University of Science and Technology

Oct 2020 - Feb 2025

Major: Information Technology

- GPA: 3.1/4.0
- 

## ADDITIONAL INFORMATION

- **Technical Skills:** JavaScript (TypeScript), Python
- **Frameworks:** ReactJS, React Native, NestJS, NextJS, Django
- **Database:** MySQL, PostgreSQL, MongoDB
- **Languages:** English

## PERSONAL PROJECTS AND FREELANCE EXPERIENCE

### Zayly AI

May 2024 - Jun 2024

- **Position:** Front-end developer
- **Project description:**
  - A website had built to allow user can make an AI chatbot. It was tailored to each company's knowledge base, enhancing customer interactions and automating support.
- **Responsibilities:**
  - Implement the client's requirements and develop according to the design and the ticket
- **Programming languages:** ReactJS, TypeScript

### Drowsiness warning for the driver

March 2024 - July 2024

- **Position:** Mentor
- **Project description:**
  - This project was created for a high school student contest. The system warns drivers by turning on a light and sounding a bell to wake them up. Additionally, it can slow down and stop the engine to ensure safer driving and help prevent traffic accidents.
- **Responsibilities:**
  - Instruct the students on how to build the system using an AI model.
  - Design the system
- **Programming languages:** Python, Yolo v5

### V-Care

March 2024 - July 2024

- **Position:** Full-stack developer
- **Project description:**
  - This project was graduation project. It was a web-based platform designed to assist users in identifying skin conditions and diseases using advanced AI technology. By leveraging a trained AI model, the system provides detailed insights and treatment recommendations to enhance user health and well-being.
- **Responsibilities:**
  - Training the model AI
  - Design the system
  - Develop the UI
  - Handle the request
- **Programming languages:** Python, Yolo v5, TypeScript, ReactJS, PostgreSQL

### CNN Create model AI

Sep 2023 - Nov 2023

- **Position:** Front-end developer, Back-end developer
- **Project description:**
  - You can create an image classification model based on your custom dataset. The system will help you train the model completely automatically
- **Responsibilities:**
  - Design the system
  - Develop the UI, handle the request from front-ent side
- **Programming languages:** Python, JavaScript, ReactJS, Django, PostgreSQL.
